Location Switzerland

Education

2025 - Till date	University of Lucerne, Master of Science in Health Sciences, Major in Health Economics and Policy
2018-2025	Bachelor of Arts in Philosophy with Sociology, University of Ghana
2015-2018	General Arts (WASSCE), Mfantsiman Girls Secondary School
2002-2015	Silicon Valley International School BECE (2015)

Projects

2026	SLCheck — Swiss medication coverage tool abbie122.github.io/slcheck • Designed, built and publicly deployed a web application covering all 10,405 products on the Swiss Spezialitätenliste, using official BAG/FOPH data. • Implemented KVG reimbursement logic: co-payment tiers (10% and 40% Selbstbehalt), limitation texts, and generic substitution with the saving per pack. • Added cost-per-unit comparison across ATC classes, parsing pack sizes from free-text German package descriptions with 99.98% coverage. • Four languages (DE / FR / IT / EN), responsive, installable to mobile.
2026	Pricing and limitation structure of the Spezialitätenliste Published analysis in Python • Analysed all 10,405 products to characterise the price distribution (median CHF 48.90, mean CHF 1,707). • Found that therapeutic classes with higher median prices carry more prescribing limitations (Spearman rho = 0.56, p = 0.039). • Quantified generic penetration by ATC class and the median switchable saving (10.6% of originator price across 264 like-for-like pairs).

- Tested and rejected the hypothesis that class price predicts generic entry, and reported the null result.

Work experience

December 2022 - November 2023	GHANA AIRPORTS COMPANY LIMITED
	• Processed airport security permit applications and validated official documentation for first-time applicants. • Maintained applicant records and coordinated police vetting documentation, working to strict accuracy requirements on regulated personal data.
September 2021- 2026	MOVAG TYRE HOUSE
	• Taking stock, maintaining and updating inventory. • Controlling basic accounting functions such as checking invoices and making deposits.
August 2020 - Till date	CASEWAL
	• Maintaining organised sales information and inventory. • Tracking timely completion of required paperwork and supporting operational smoothness.

Skills

Analysis	Stata, Python (pandas, scipy, matplotlib), Jupyter, Excel
Domain	Swiss KVG reimbursement and the Spezialitätenliste, HTA principles, pricing and market access, comparative health systems
Technical	HTML, CSS, JavaScript, Git and GitHub, large public health datasets
Languages	English — fluent (degree taught in English). German — elementary, learning.
References	Available on request.
